Let me tell you guys, performances were excellent! We had a few technical kinks, but they went away. Fog machine was acting funny and farting..?

Poor Richard(Mike Lane), you had to feel for him. Man he got screwed.

Mike has been with me over year and he always comes through like a pro. Check him out, he is in the latest issue of Fangoria magazine!

Wonderful elegant performances from Elli & ED (Dimension Travelers) and Shara Lerman (Carolyn)

Anthony Baez pulled off the Doctor role on the spot!! WOW! Talk about short notice casting and survival acting skills of the fittest. That takes talent especially when I am too demanding and mean these days. :)

Brandy came through as a new addition to our team. She sparkled and was put on the spot to spice improv. Yep, expect that from me. Whatever it takes to get the shot!

Joe and I got in a brawl and I kicked his ass and body slammed him! Naah, he is the best P/A in the house. He's awesome.

Thanks to Martin and Ozgur and SAM Schifrin for doing whatever it takes to make the actors shine!

Glad to have you back Martin!
